(Room 222)  
Washington, D.C. 20554

Subject: ET Docket No. 92-298

Dear Ms. Searcy:

The undersigned is a director of engineering who has served as chief engineer of a number of major market stations, including New York, San Francisco and Los Angeles. I am also consultant to other broadcast groups, indeed, I have just returned from a 2-1/2 week consulting assignment in England. Therefore, I was not aware of the Commission's subject NPRM. Accordingly, I do not have sufficient time to prepare the type of response that the Commission's Notice requires.

Suffice to say, I have installed and operated AM Stereo equipment in major markets not only since the Commission authorized AM Stereo in 1982, but I was chief engineer of a station that conducted experimental tests and submitted detailed engineering reports to the Commission prior to 1982.

These tests and my years of experience with AM Stereo causes me to oppose the Commission's naming of the Motorola system as a standard. This system not only provides unacceptable night time performance, but creates severe (night and day ) adjacent channel interference.

Accordingly, I respectfully request the Commission to reverse its position and select the Kahn system for its standard.

No. of Copies rec'd
